For Immediate Release

Electric Safety Edge Withstands Five Million Cycles

Electric Safety Edges are now standard on all Door Engineering four-fold and industrial door systems. Manufactured to have true multidirectional contact, the safety edge is effective throughout the travel of the door. It is engineered for maximum sensitivity, safety and durability up to five million cycles.

Other standard features include: adjustable, snap-in housing for easy installation and UL/CUL recognition. Safety Edge options include: fail-safe wiring, intrinsically-safe wiring and a IP67 fully sealed housing for wash-down facilities.
