FOR IMMEDIATE RELEASE

**DOOR ENGINEERING ANNOUNCES FOUR-FOLD GT™**  
Four-Fold Door system redesigned as a trackless gating system

Door Engineering has added a trackless folding gate system to their product line offering! Just like their original Four-Fold Door System, the Four-Fold GT™ has the high speed, high cycle operation with low maintenance. Adding to its appeal over a conventional sliding cantilevered gate is the minimal moving parts and minimal space it requires. The Four-Fold GT™ is a free standing column design with the operators mounted on the columns. With standard opening sizes up to 20' wide and custom panel options, the Four-Fold GT™ will not only fit any gating need , it will be aesthetically appealing as well!
